

CUSTOM NETWORK DEVELOPMENT SOLUTIONS

At Trilogy Health Solutions (THS), we understand the importance of ensuring all members have adequate and timely access to providers and facilities. Developing and maintaining a strong provider network is a time-consuming but vital task, and is critical for ensuring your members have access when they need it most. An inadequate network can lead to unnecessary patient anxiety, reduced or delayed access to care, and increased overall costs.

At THS, we develop custom provider networks to address specific health plan needs while ensuring compliance with applicable state and federal guidelines. Our approach builds coordinated networks that support favorable clinical outcomes while meeting your individual scale and operational efficiency needs.

Our comprehensive network development solutions allow you to refocus your energy where it matters most – on your members.

CUSTOMIZABLE NETWORK DEVELOPMENT SOLUTIONS

- Build a custom network of specialists to meet your specific health plan needs
- Review and optimize your current provider network
- Evaluate current network quality and provide insight and remediation for any network deficiencies
- Provider directory development with the use of proprietary technology
